SUMMARY

Final-year Electronics & Telecommunication Engineering student with hands-on experience building full-stack web and Java applications. Strong foundation in Data Structures & Algorithms, Object-Oriented Programming, DBMS, SQL, and software development fundamentals. Experienced with Java, JavaScript, TypeScript, React.js, Node.js, Express.js, MongoDB, MySQL, JDBC, REST APIs, authentication, and CRUD operations. Built and deployed practical applications involving frontend development, backend services, database integration, and payment processing. Seeking an entry-level Software Engineer, SDE, or Software Developer role.

TECHNICAL SKILLS

Languages: Java, JavaScript, TypeScript, SQL

Web Development: HTML5, CSS3, React.js, Node.js, Express.js, REST APIs

Databases: MongoDB, MySQL, PostgreSQL

Core CS: Data Structures & Algorithms, OOP, DBMS, Collections, Exception Handling

Development: JWT, Authentication, CRUD, JDBC, React Router, Tailwind CSS

Tools: Git, GitHub, VS Code, IntelliJ IDEA, Docker

PROJECTS

EventEra – Event Booking Platform

React.js, Node.js, Express.js, MongoDB, Razorpay Live | GitHub

- Developed and deployed a full-stack event booking platform supporting event discovery, event creation, ticket booking, and online payments.
- Built RESTful backend APIs using Node.js and Express.js for authentication, events, bookings, and user management.
- Implemented OTP-based email authentication, JWT authorization, password hashing, and protected routes.
- Designed MongoDB data models for users, events, bookings, and authentication workflows.
- Developed a responsive React.js frontend using React Router, Tailwind CSS, Axios, and reusable components.
- Integrated Razorpay for online event ticket payments and deployed the application for live access.

Hospital Management System

Java, Java Swing, JDBC, MySQL GitHub

- Developed a Java Swing desktop application for managing hospital patients, doctors, appointments, and billing.
- Implemented CRUD operations and persistent database storage using Java, JDBC, and MySQL.
- Applied OOP principles and DAO-based architecture to organize GUI, application logic, and database operations.
- Designed application workflows for patient registration, doctor management, appointment scheduling, and billing.

EDUCATION

PVG's College of Engineering, Technology and Management, Pune

2023 – 2027

B.E. – Electronics & Telecommunication Engineering, Savitribai Phule Pune University

CGPA: 8.25/10

CODING & PROBLEM SOLVING

- **LeetCode:** Solved Data Structures & Algorithms problems with consistent problem-solving practice.
- **DSA:** Practicing arrays, strings, linked lists, stacks, queues, recursion, searching, sorting, and fundamental DSA patterns.
- **Core CS:** Strong foundation in OOP, DBMS, SQL, Data Structures & Algorithms, Collections, and database concepts.
- **Software Development:** Hands-on experience developing applications with frontend interfaces, backend APIs, authentication, databases, and third-party service integration.
